Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
Import a repository.

Owner *   Repository name *

🐱 andrii-pukhalevych-nuos ▾   /   lab-java   ✓

Great repository names are short and memorable. Need inspiration? How about studious-spoon?

Description (optional)

Лабораторні роботи з дисципліни Технології розробки ПЗ на платформі JAVA

○ 📓 **Public**
         Anyone on the internet can see this repository. You choose who can commit.

⦿ 🔒 **Private**
         You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☑ **Add a README file**
     This is where you can write a long description for your project. Learn more.

☐ **Add .gitignore**
     Choose which files not to track from a list of templates. Learn more.

☐ **Choose a license**
     A license tells others what they can and can't do with your code. Learn more.

This will set 🔀 main as the default branch. Change the default name in your settings.
